

<b>10/08/09 - Newsletter for 40th week 2009 update</b>
--

Dear client.

A new version of the MediSIM database (update for W40 of 2009) is now available.

We have made some changes in the database and they are listed below:

1. We have corrected the bridging problem between Loquen tbl 60 x 25 mg and Loquen tbl 60 x 300 mg.
2. We have removed sales of the the product Eloxatine inj 5 x 50 mg and added this sales to Eloxatin inf 1 x 10 ml.
3. Information for product Actonel Combi tbl 1 x 35 mg + granules 6 x have been corrected (we have corrected ATC code, DOT and DDD information).
4. Duplicated application form (orodispersible tablet) has been corrected.
5. DOT information for entire B05 and B06 ATC group has been corrected.
6. We have removed the sales of wholesalers towards the Natural Commodity Reserves. With this we have disabled the option for duplication of the sales in our database.

If you have any questions regarding the changes do not hesitate to call us.

We have also added some new products, brands and ATC codes into the database. Please find the information in the tables below.
